game. The scoring is similar to normal poker: one four-letter word is better than a three and two-letter word (in normal poker four of a kind is better than a full house). The longer your word, the better your chances of winning.

To play, type a word from your letter cards and press **ENTER**.

You can make two words by typing a **SPACE** between them. Watch for the dealer's moves.

You need to know the following poker terms before you begin to play, as they appear as prompts on the screen.

Raise Means you'll increase the dealer's bet.
You can raise it up to \$100.

Note: To type a bet, press **Q-P** for numbers. The pot starts at \$1000, with a \$10 ante (the initial bet to start the game). If you are unable to make a word at the time, type letters that you are likely to use later from those you are dealt. To erase a letter, press **BACK**. To continue without typing letters, press **ENTER**.

If you bet before the house does, you see a prompt, "Pass, Bet or Fold." If the house bets first, you see a prompt, "See, Raise, or Fold." You can discard up to three letters. After discarding, you see a message showing how many cards, if any, the house discarded. If the hand ends in a tie, you do not lose your money. The pot carries on to the next hand.
