90g with Slim Battery

Performance

Talk time: up to 210minutes (with 780 mAh Battery)

Standby time: up to 200 hours (with 780 mAh Battery)

Operating Frequency

GSM 900MHz / DCS 1800MHz Dual Band

Some of the contents in this User Manual would differ from that in your phone.

It may differ depending on the S/W version and the network provider you subscribed to.

CAUTION

Please check and follow simple guidelines below for your safety and proper operation of the phone.

ANTENNA

Using unapproved antenna can cause severe damage or malfunction to the phone.

TRAFFIC SAFETY

Firstly, check and make sure you are aware of the traffic regulations related to the wireless phone use. Don't use a hand-held phone while driving a vehicle. If you want to use the phone while driving, please install a car kit.

ELECTRONIC DEVICES

RF(Radio Frequency) signals may affect improperly installed or inadequately shielded electronic devices.

HANDS-FREE KITS

Do not install the hands-free kits in the area over the air bag, in the air bag deployment area, or in the area where serious injury could result.

CAUTION

MEDICAL DEVICES

Switch the phone off in hospitals.

Follow any regulations or rules of the hospital.

Switch the phone off to avoid interference with pacemaker, or even other medical devices.

Consult a physician or the manufacturer of the medical device if you have any questions about using the phone in hospital.

PUBLIC PLACE

Do not turn on the phone in the area where wireless phone use is prohibited.

BOARDING AN AIRCRAFT

Switch off your phone before boarding an aircraft.

The use of wireless telephones in an aircraft may be dangerous to the operation of the aircraft.

EXPLOSIVE ATMOSPHERES

Switch off your phone in any area with a potentially explosive atmosphere and obey all signs and instructions.

Do not separate battery from the phone in a potentially explosive atmosphere.

CAUTION

USER GUIDE

If the phone does not work properly, take it to the nearest qualified service facility.

Always use only approved accessories and batteries.

Do not connect incompatible devices.

RF(Radio Frequency) from the phone can affect to the human body, so avoid prolonged exposure to RF.

Remember to make backup copies of important data, such as phonebook, etc.

EXPOSURE TO RADIO WAVES

Your mobile phone is a radio transmitter and receiver.

It is designed and manufactured not to exceed the limits of exposure to RF energy recommended by independent scientific organizations through evaluation of scientific studies.

Use only batteries, chargers and accessories approved by the authorized manufacturer .

The use of unauthorized items can not guarantee the permitted guidelines, and also can not ensure the safety of all persons, regardless of age and health.

CAUTION

PROPER USAGE

Use the phone only in its normal operating positions.

Don't touch or bend the antenna unnecessarily while you are calling. It may degrade the call quality and eventually limit the battery's performance.

Do not attempt to disassemble the phone.

Non-expert handling may cause damages.

Use only the supplied or approved batteries, chargers and accessories with this phone model.

The use of any unauthorized items may invalidate the warranty.

Antenna

Ear-microphone

Camera & Flash key

Side keys

MAIN LCD

There are two LCD displays (Main and Sub).
The line at the top of the display is for icons showing the status of the mobile phone.

Main LCD Display

Icons are displayed when specific functions are active or when you have received a message.

The figure above shows the list of all possible icons and their position.

Screen status, display and function

For the description of each icons, please refer to the table below

	Signal strength	This icon shows the radio signal strength. The more bars displayed, the stronger the signal.
	Vibration	This icon will appear when ring type is "Vibration" and in Etiquette mode.
	Alarm	This icon will indicate alarm set.
	Roaming	This icon will appear when roaming service is applied.
	Battery	This indicates the remaining power of the battery.
	Ear-microphone	This icon will appear when your phone is connected to ear-microphone
	Telephone lock	This icon will appear when you press and hold the [] key.
	MMS full	This icon will appear when your MMS box is full.
	MMS	This icon will appear when unread MMS exists in your phone.
	Message	This icon will appear when unread message exists in your phone.
	In use	This icon indicates call active state.
	No calls	This icon will appear while you're connecting WAP CSD.
	Divert calls	This icon will appear when you divert calls.
	Ringing tone	This icon will appear when ring type is "Ringing tone".
	Vib+Melody	This icon will appear when ring type is "Vib+Melody".
	GPRS	This icon will appear when you insert SIM card and when your phone is in service area.
	WAP GPRS	This icon will appear when your phone is connected to WAP GPRS.
	WAP security	This icon will appear overlapped with 'WAP GPRS' icon when you connect 'WAP GPRS security'. This icon will appear overlapped with 'In use' icon when you connect 'WAP CSD'.

MAIN LCD

	Voice mail	This icon will appear when you receive voice mail.
	Etiquette mode	This icon will be appear when you press and hold the [] key.

SUB-LCD MENU OPTIONS

You can access certain menus without opening the phone. The following sections describe the options in the sub-LCD menu and their functions respectively.

Accessing the sub-LCD menu

In standby mode with the phone closed, press and hold [] key to enter the sub-LCD menu screen. Press [] / [] keys to browse between the functions in the screen, then press [] key to select and enter. Press and hold [] key if you want to return to standby mode.

Recent Call

With this function, you can check the list of all recent calls and make calls to these numbers while using hands-free kit.

- 1). Scroll to "Recent Call" and press [] key.
- 2). Scroll to the Recent Call number which you want to check. By pressing the headset button of the hands-free kit, you can make a call to the selected number.

SMS Inbox

With this function, you can check the received SMS messages.

- 1). Scroll to "SMS Inbox" and press [] key.
- 2). Scroll to the message which you want to check and Press [] key.

SUB-LCD MENU OPTIONS

Flash On

Our Phone provides you with a unique option to use the camera flash as an emergency light.

- (1). On standby mode, press and hold [] key to turn on the flash
- (2). Release the key to turn off the flash.

FUNCTION KEYS

There are function keys, which have one or more features. Following table shows list of function keys.

Function keys

Key Icon	Name	Key Function
	SEND KEY	Press this key to make a call, or answer incoming call. Press this key once to retrieve the list of All Calls (recently dialed, received, and missed call numbers)
	END KEY	Press this key to end a call. Press this key to return to standby state. (Cancel, Exit). Press and hold this key to turn the phone on or off.
	OK KEY	Use this key to confirm the selected function or menu on the display.
	MENU KEY	Press this key to enter menu. When pressed, the menu will be displayed on the screen.
	CLEAR KEY	Press this key to delete a single letter and press and hold this key to clear a line. Press this key to return to the previous screen.
	NAVIGATION KEYS with shortcut keys to WAP, Sound setting, Message and Phonebook	Press these keys to move the cursor up/down or left/right in menu or in list. During a call, press 'up' key to see recently received call list and press 'down' key to see missed call list. These keys may act as shortcut keys by which you can easily access Phonebook, Sound Setting, Messages and WAP browser.
	SIDE UP and DOWN KEYS	Press these keys to adjust the phone speaker volume during a call. When in sleep mode with the phone closed, press one of these keys (or camera key) to activate the sub-LCD display.
	CAMERA KEY	Press the key to take pictures of people or events while on the move.

INSTALLING SIM CARD

Follow the steps below for the first time use; Install the SIM card
When you subscribe to a cellular network, you are provided with a plug-in SIM card loaded with your subscription details (PIN, optional services available and so on).

- 1) If necessary, switch off the phone by holding down [] key until the powering down message is displayed.
- 2) Make sure the battery is removed.
- 3) Clear the SIM slot, and place the SIM card into slot in the direction of the arrow.
- 4) If you want to remove the SIM card, push it in the opposite direction of the arrow.

USING THE BATTERY

Installing the battery

(1) Insert the bottom of battery into the groove at the bottom of the handset.
Then (2) press in the top of the battery until it snaps.

Removing the battery

Push the tab (1) with one hand and lift the top of the battery (2) to separate.

Note!

The battery must be correctly placed in the battery compartment.
If battery is incorrectly inserted, the handset will not turn on or the battery may slip out during use.

CHARGING THE BATTERY

Your phone is powered by a rechargeable Li-ion battery. A travel adapter is provided with your phone. Use only approved batteries and chargers. Ask your local PANTECH dealer for further details.

The phone can be used while the battery is charging. To Charge, make sure the battery is in position on the phone. Plug the charging connector into the slot at the bottom side of the phone, and plug the adaptor to a standard AC wall outlet. When charging is finished, disconnect the adapter by pressing the gray tabs at the side of the connector and pulling against the slot. Also, disconnect the adaptor from the AC wall outlet.

GETTING STARTED

- Turn on/off the phone power
- Make a call
- End a call
- Answer a call
- Adjust the earpiece volume
- Browse main menu
- Type numbers and letters on handset

TURN ON THE PHONE POWER

Turn on the phone power

Press and hold the [] key for 3 seconds to turn the phone power on. (Do the same to turn off the power)

If the handset is in the lock mode, enter your 4 digit secret number. (Initially, "1234" for SIM lock code, "1234" for handset lockcode.)

MAKE A CALL

Make sure the phone power is on.

Insert SIM card into the SIM slot if "Insert SIM card" message is shown. Enter your PIN1 (Maximum up to 8 digits) to unlock handset (if applicable). After the PIN is accepted, network search will start automatically. When you press the wrong number, press

[] key to delete. (Press and hold to delete all)

In the idle mode, dial the phone number with area code.

Then press [] key to make a call. When you'd like to make an international call, press and hold [] key until "+" sign appears.

Then dial national code, area code and telephone number.

With long press [] key, you can add 'P' pause symbol.

If the number you want to call has an extension number, use this key between the main number and the ext. number to call directly to the extension.

END A CALL

Press []key to end or cancel a call

ANSWER A CALL

When the phone rings or vibrates, the screen will display the name or the number of the caller (If the network you subscribe to supports this).

The display of name is dependent on the data in the Phone book.

Press []key to answer a call in normal answering mode option. With the Any Key option, you could answer a call by pressing any key except []key.

ADJUST THE EARPIECE VOLUME

When you are speaking with your phone, press the volume adjustment keys on the side of the phone to adjust earpiece volume.

Seven levels of volume are available for your selection.

BROWSE MAIN MENU

Press []key to enter main menu in standby mode.

Press []key to exit menu to standby screen.

With navigation keys, [] [] and [] [], you can browse among menu items.

To make a decision or answer the question, press []key as YES, or []key as NO.

TYPE NUMBERS AND LETTERS ON HANDSET

To enter number, press the number keypad, as you want.

To enter letters into handset, you can either be in 'T9' mode or in Multi-tab mode (e.g.Phone book, Message).

Letter can be erased by pressing []key.

BASIC CALL FUNCTIONS

- Speed Dialing
- Make an international call
- Missed call message
- Phonebook shortcut
- Last number dialed (received, missed)
- Incoming call waiting
- During call options

SPEED DIALING

You can retrieve and call the desired number by pressing and holding the number of the phonebook in which you saved the number to call. For instance, if the number is saved in the Phonebook number 5, press and hold [] key to make a call.
(For more details, please refer to "HOT KEY/Phonebook" page)

MISSED CALL MESSAGE

If for any reason, an incoming call cannot be answered, a missed call message will appear on the screen to remind you of the call you missed (Network and subscription dependent feature, not available in all areas). To reply to the missed call, first press [] key, then press [] [] key to select the number you want to reply to and press [] key to dial it.

MAKE AN INTERNATIONAL CALL

Firstly, press and hold [] key until '+' shows up on the display or enter the outgoing national code. Then enter the number you want to call.

PHONEBOOK SHORTCUT

Under standby mode, you can press the [] key to enter the Phone book and browse the sub menu entries.

LAST NUMBER DIALED/RECEIVED/MISSED

Press [] key to access the list of latest dialed/ received /missed numbers.

Press [] [] Key to scroll through the last dialed numbers.

Press [] key to send the call if the number shown is correct.

INCOMING CALL WAITING

(This is the Network and subscription dependent feature.)
Please check with your Network provider before using this function)

When a call comes in, you can press [] keys to enter the call options.

1. Answer
2. Reject
3. I am busy

If another call comes in while you are on the phone, you can:

Press [] key to reject the incoming call.

Press [] key to hold on the active call and connect to the incoming call.

DURING CALL OPTIONS

When you are on a telephone call, you can press [] keys to enter the call options.

1. Phonebook
2. Messages
3. Volume
4. Hold
5. End current
6. Mute on
7. DTMF on/off
8. Multi-party

Each function is described as follows in detail.

Phonebook - You can look through the phonebook.

Message - You can read and write SMS/EMS and check Voicemail.

Volume - You can adjust the phone speaker volume.

Hold - This function allows you to put a currently active call on hold, so that you can initiate a new call.

End current - You can end a current call by selecting this function.

Mute - When you want no sound to be heard by your caller during a call, you can choose the Mute function to do so.

DTMF on/off - This function allows you to turn DTMF tone on/off.

If DTMF(Dual Tone Multi Frequency) is turned off, the recipient will not hear the key sounds while you're pressing the keys.

Multi-party - You can communicate with 3 to 7 telephones simultaneously.

HOW TO USE T9

Key	T9 Number	T9 English	Multitap

CARE AND MAINTENANCE

Followings are to help ensure the proper use and the life of your mobile phone.

Keep your mobile phone and its accessories out of small children's reach.

Keep it dry. Use your phone at a normal temperature.

Temperature higher than 55 ° C or lower than 20°C (Higher than 131° For lower than-4°F) may cause damage to your phone.

Do not use or store your mobile phone in dusty or dirty areas if possible.

Do not attempt to open your mobile phone.

Do not drop, knock or shake it.

Do not use harsh chemicals, cleaning solvents, or strong detergent to clean mobile phone.

If your mobile phone or its accessory is not work properly, contact your dealer immediately.

Use only approved batteries, battery chargers and accessories to help ensure the proper function of your phone and battery life. Any malfunction or damage caused by the use of any third-party accessories will void the limited product warranty.

Keep battery contacts and battery charging socket at the bottom of your phone from direct contact with conductive objects. Otherwise it could cause a short-circuit and result in potential damage or harm.

TROUBLESHOOTING

If you have any problem while using your phone, please refer to following check lists to solve problem.
If the problem persists, please contact your dealer immediately for services them.

“Insert SIM Card” message appears

Make sure that the SIM card is correctly installed.
Check SIM is working properly, it may be defected or out of order.
If so, send it to network service provider.
Or, clean the SIM card contact.

“Handset locked enter password” message appears

Enter the valid lock code.
If you don't know the valid lock code, contact dealer near you.

“Enter PIN1” appears

Enter the valid PIN1 code with the SIM card.
If you don't know the code, contact your dealer.
With handset locked with 3 invalid trials, incoming call could be received.

“No service”, “Network failure” is displayed

Check the signal strength indicator. The network connection was lost. You may be in the basement or building where signal is weak. Move to other location to receive signal properly. In another case, you may be too far from the base station of your network service provider.
Then, ask your network service provider service range map.

TROUBLESHOOTING

Audio quality is poor. Echo, or noise makes it hard to hear

Hang up the phone and then dial again.
You may be switched to a better quality network line.

Correspondence cannot hear you speaking

Your mobile phone is set to enable MUTE function.
Make mobile phone to UNMUTE by pressing.

The standby time becomes short

You may be in weak signal area.
Turn it off temporarily while you are expecting no calls.
Or your mobile phone battery life may be over.
Then, get a new battery.

The phone is not turned on

Check the battery capacity or charge the battery.
You can turn your phone on to check during charging.

Unable to send message

You may have not subscribed to SMS service or network service provider in your area couldn't support service.

Unable to make a call

Your mobile phone is set to fixed dial function.
Then, cancel fixed dial function.

TROUBLESHOOTING

Unable to charge the battery

It could be one of 3 possible situations: one is that your mobile phone charger is out of order. Then contact dealer near you. Another is that you attempt to use your mobile phone in severe temperature.

So, change the battery-charging environment.

The other is the poor connection. Then check the connector.

Unable to input data in the Phonebook

Your phonebook memory is full.

Delete some entries from phonebook list.

Unable to choose certain function

You are not subscribed in that service or in network service provider where not support that service.

Contact your service provider.

USING THE BATTERIES

Your mobile phone is equipped with Li-on battery.

The following batteries are also available (Contact dealer near you):

-Standard battery

-Slim battery

Precautions when using batteries

Do not use any charger and battery that is damaged in anyway.

Use the battery only for its intended purpose.

If you use the phone near the network's base station, it uses less power; talk and standby time will increase as strong as signal strength.

Battery charging time depends on the remaining battery charge and type of battery and charger used.

Battery lifetime is about hundreds times in charging and discharging, but it will gradually wear out. Use only approved battery and recharges your battery only with approved chargers.

When a charger is not in use, disconnect it from the power outlet.

Overcharging makes battery lifetime shortened.

Do not leave the battery in hot or cold places, such as in a car in summer or winter. This reduces the capacity of battery.

Always try to keep the battery at room temperature.

Do not short-circuit the battery. Accidental short-circuiting can occur when a conductive object contacts both contact directly.

Short-circuiting terminals may damage the battery.

Dispose of used batteries in accordance with local regulation.

Always recycle. Never dispose of batteries in fire.

Don't use other than the specified battery charger.

To prevent injury or burns, don't allow metal objects to contact or short circuit the battery terminals.

Don't discard the Battery Pack into fire.

SAFETY INFORMATION

Road Safety

Remember, road safety always comes first.

Do not use a hand-held telephone while driving a vehicle.

If using a hand-held phone, park the vehicle before conversing.

Always secure the phone in its holder; do not place the phone on the passenger seat or where it can break loose in a collision or sudden stop.

The use of an alert device to operate a vehicle's lights or horn on public road is not permitted.

OPERATING ENVIRONMENT

Remember to follow any special regulations in force in any area and always switch off your phone whenever it is forbidden to use it, or when it may cause interference or danger.

When connecting the phone or any accessory to another device, read its user's guide for detailed safety instructions.

With other mobile radio transmitting equipment, users are advised use mobile phone in the normal operating position for the satisfactory operation of the equipment and for the personnel (Held to your ear with the antenna pointing over your shoulder)

ELECTRONIC DEVICES

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Operation of any radio-transmitting equipment may interfere with inadequately protected medical devices.

Consult a doctor or the manufacturer of the medical device if you have any questions. Other electronic equipment may also be subject to interference.

Always switch off the phone when at a refueling point (service station).

You are reminded of the need to observe restrictions on the use of radio equipment in fuel depot (Fuel storage and distribution areas), chemical plants or where blasting operations are in progress.

Do not store or carry flammable liquids, gases or explosive materials in the same compartment as the phone, its parts or accessories.

Switch off your mobile phone when in an aircraft. The use of mobile phones in an aircraft is illegal and may be dangerous to the operation of the aircraft or disrupt the cellular network.

Failure to observe this instruction may lead to the suspension or denial of cellular telephone services to the offender, legal action or both.

EMERGENCY CALLS

IMPORTANT!

This phone, like any wireless phone, operates using radio signals, wireless and landline network as well as user-programmed functions, which cannot guarantee connection in all condition. Therefore, you should never rely solely upon any wireless phone for essential communications (e.g.medical emergencies).

Remember, to make or receive any calls the phone must be switched on and in a service area with adequate cellular signal strength. Emergency calls may not be possible on all wireless phone networks or when certain network services and/or phone features are in use.

Check with local cellular service providers:

To make an emergency call:

If your phone is not on, Switch it on.You should be in a service area,so check the radio signal strength.

Emergency calls may not be possible on all cellular phone networks or when certain network services and/or phone features are in use.

Check local cellular service provider.
